SUMMARY

Front-End Developer specializing in React and TypeScript, with experience building scalable web applications and integrating backend services using Node.js, Express, and MongoDB. Improved API response time by approximately 25% through backend optimization and reusable component design. Skilled in developing clean, user-focused interfaces with a strong emphasis on maintainability and performance in Agile environments.

SKILLS

Frontend: React, TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Bootstrap
State Management: Redux Toolkit, Context API
Backend: Node.js, Express.js, REST APIs
Databases: MongoDB, MySQL
Tools: Git, GitHub, npm, Vite
Practices: Agile Methodologies, Component-Based Architecture
Soft Skills: Problem-Solving, Teamwork, Communication, Adaptability
Languages: Arabic (Native), English (Professional)

PROJECTS

- Craftora** | *React, Node.js, Express.js, MongoDB, Stripe* | [demo]
- Developed a full-stack e-commerce platform managing over 100 products with authentication and Stripe payment integration
 - Reduced API response time by approximately 25% through backend optimization and efficient data handling
 - Designed reusable frontend components and implemented RESTful APIs using Express.js to improve scalability and maintainability
- Hasmin – Bakery Website** | *React, Tailwind CSS* | [demo]
- Built a responsive, mobile-first website with optimized performance across various screen sizes
 - Ensured consistent UI/UX and cross-browser compatibility using Tailwind CSS and reusable components
- Flyee – Flight Booking Website** | *React, JavaScript*
- Developed an interactive booking interface with dynamic state handling to enhance user experience
 - Structured modular components to support scalability and maintain clean code architecture
- ShopCart – E-Commerce Application** | *React, Redux Toolkit, Vite*
- Built a scalable e-commerce application using Redux Toolkit for centralized state management
 - Improved rendering performance by reducing unnecessary re-renders and optimizing component structure

TECHNICAL EXPERIENCE

- | | |
|---|------------------------------|
| Information Technology Institute (ITI)
<i>Web Development Intern (MEARN Track)</i> | Nov 2024 – Apr 2025
Egypt |
| <ul style="list-style-type: none">– Built full-stack applications using React, TypeScript, Node.js, Express, and MongoDB– Designed and integrated RESTful APIs to handle application data efficiently– Developed responsive front-end interfaces using component-based architecture and Bootstrap– Implemented state management using Redux Toolkit and Context API– Collaborated in Agile teams using Git and GitHub | |
| Personal Projects
<i>Front-End Developer</i> | 2025 – Present
Remote |
| <ul style="list-style-type: none">– Built and deployed web applications with real-world features including authentication and payment integration– Applied Redux Toolkit for centralized state management in scalable applications– Designed reusable component architectures to improve maintainability– Optimized performance by reducing unnecessary re-renders | |

ADDITIONAL EXPERIENCE

UKLC (UK Language Courses)

Summer 2025

Activity Team Leader

Manchester, UK

- Led and coordinated groups of international students in a fast-paced environment
- Handled real-time problem-solving, ensuring safety and engagement
- Collaborated with diverse teams, strengthening communication and leadership skills

EDUCATION

Assiut University

Sep 2020 – Jun 2024

Bachelor of Computers and Information (Bioinformatics)

Assiut, Egypt

- GPA: 3.5 / 4.0
- Relevant Coursework: Data Structures, Algorithms, Database Systems, Web Development, Software Engineering
