## SUMMARY

Results-driven Front-End Developer specializing in modern JavaScript frameworks and TypeScript, with experience building 5+ web applications and backend-integrated solutions using Node.js, Express, and MongoDB. Improved API performance by approximately 25% on an e-commerce platform and enhanced maintainability through reusable component architecture. Skilled in developing scalable, high-quality interfaces within Agile environments, with a strong focus on usability and clean architecture.

## SKILLS

**Frontend:** React, TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Bootstrap

**State Management:** Redux Toolkit, Context API

**Backend:** Node.js, Express.js, REST APIs

**Databases:** MongoDB, MySQL

**Tools & Practices:** Git, GitHub, npm, Vite, Agile Methodologies

**Soft Skills:** Problem-Solving, Teamwork, Communication, Adaptability

**Languages:** Arabic (Native), English (Professional)

## PROJECTS

**Craftora** | *React, Node.js, Express.js, MongoDB, Stripe* | [demo]

- Built an end-to-end e-commerce platform managing 100+ products, optimizing backend performance and reducing API response time by approximately 25%
- Implemented secure authentication and integrated Stripe payment processing, enabling seamless checkout functionality
- Designed reusable component architecture and structured REST APIs using Express.js, improving maintainability and scalability

**Hasmin – Bakery Website** | *React, Tailwind CSS* | [demo]

- Built a modern, mobile-first website using reusable component architecture, improving load speed and usability across devices
- Ensured cross-browser compatibility and consistent UI design using Tailwind CSS

**Flyee – Flight Booking Website** | *React, JavaScript*

- Created an interactive booking interface with dynamic state handling, improving navigation flow and usability
- Structured modular components to enhance maintainability and support scalability

**ShopCart – E-Commerce Application** | *React, Redux Toolkit, Vite*

- Built a scalable e-commerce application using Redux Toolkit, enhancing data consistency and application reliability
- Optimized rendering performance through efficient state updates and component reuse

## TECHNICAL EXPERIENCE

**Information Technology Institute (ITI)**

Nov 2024 – Apr 2025

*Web Development Intern (MEARN Track)*

Egypt

- Completed an intensive 4-month web development program, delivering 4+ production-level applications using React, TypeScript, Node.js, Express, and MongoDB
- Engineered and integrated REST APIs using Express.js to handle data operations and improve application efficiency
- Built dynamic front-end interfaces using component-based architecture and Tailwind CSS, improving cross-device compatibility and performance
- Implemented state management using Redux Toolkit and Context API to ensure efficient data flow across applications
- Collaborated within Agile teams using Git and GitHub workflows for version control and team coordination
- Enhanced performance and maintainability by developing reusable components and optimizing rendering behavior

## Freelance & Personal Projects

2024 – Present

### *Front-End Developer*

Remote

- Built and deployed 4+ web applications, improving performance and usability
- Developed e-commerce platforms with payment integration using Node.js and MongoDB
- Utilized Redux Toolkit for scalable state management and efficient data handling
- Designed reusable component architectures to enhance maintainability and reduce code duplication
- Deployed applications using Netlify and GitHub, ensuring continuous delivery

## EDUCATION

---

### **Assiut University**

Sep 2020 – Jun 2024

### *Bachelor of Computers and Information (Bioinformatics)*

Assiut, Egypt

- **GPA:** 3.5 / 4.0
- **Relevant Coursework:** Data Structures, Algorithms, Database Systems, Web Development, Software Engineering
- Strong foundation in programming, problem-solving, and software development principles
